

Sección INDICES DE PRECIOS

La Sección de Indices de Precios de la Dirección General de Estadística y Censos comenzó sus labores el 1º de enero de 1952.

Como antecedente a su creación, cabe mencionar que la Dirección había realizado en setiembre de 1949 una encuesta sobre condiciones de vida en un grupo de 258 familias ubicadas en San José, que sirvió para dar información amplia sobre gastos y consumos familiares. Con esos datos obtenidos, la Oficina estuvo en capacidad de formar una base para un índice de precios al consumidor de la ciudad de San José. Este ha venido calculándose desde el mes de febrero de 1952.

En el año 1955, entre octubre y noviembre se llevó a cabo una encuesta en las zonas Bananeras (Golfito, Quepos y Limón) y la parte rural de la Meseta Central con el fin de establecer índices de precios en esas zonas. Se tomó como familia "representativa" la familia de trabajadores agrícolas y la investigación se hizo sobre 1.200 familias distribuidas así:

| Zonas | Número de familias investigadas |
|----------------|---------------------------------|
| Meseta Central | 300 |
| Golfito | 450 |
| Quepos | 200 |
| Limón | 250 |

Entre abril de 1956 y marzo de 1957, se recopilaron los precios al consumidor de las zonas antes mencionadas, los que dieron base a la formulación de los índices respectivos. Estos índices se publicaron por vez primera en setiembre de 1957 junto con los de San José, y desde entonces se vienen publicando mes a mes, en un boletín que lleva por nombre "Índices de Precios al por Menor".

Para calcular los índices a los cuales nos hemos referido, la Sección por medio de personal entrenado, obtiene cada mes los precios de aquellos artículos y servicios escogidos en el período base, los cuales son obtenidos de establecimientos también previamente seleccionados.

Todos los bienes y servicios están convenientemente especificados con el fin de lograr seguir las variaciones de una misma calidad.

El promedio anual del Índice General de Precios para San José en 1959 fue de 113.39; el de Alimentación 114.96; Vestuario 96.91; Vivienda 135.06; Electricidad-Combustible-Hielo 139.54; Enseres Domésticos 101.29 y Misceláneos 110.71.

Los índices de precios para Golfito, Quepos, Limón y Meseta Central han mostrado desde que se calculan variaciones muy pequeñas, fluctuando de abril de 1957 a diciembre de 1959 en la siguiente forma: de 101.63 a 101.83 en Golfito; de 98.84 a 98.09 en Quepos; de 102.76 a 104.71 en Limón y de 102.03 a 101.64 en la Meseta Central.

Seguidamente se presentan varios cuadros en donde se da información detallada sobre los índices de precios ya mencionados.

Cuadro 53.- INDICES DE PRECIOS PARA EL CONSUMIDOR MEDIO Y OBRERO DE SAN JOSE, POR GRUPOS PRINCIPALES Y MESES: 1957 A 1959
 (Base: febrero a diciembre de 1952 = 100.00)
